

# ASA4 Sliding gate motor.

One of our biggest sellers the ASA4 is also the smallest both physically and by capacity in our range. But don't be fooled the ASA4 is the perfect motor for most Australian residential sliding gates. Most gates in Australia are built using tubular steel and rarely make 200kg in weight making the 400kg rated ASA4 the perfect choice. The ASA4 comes complete with built in logic control, wireless receiver, prewired loops, mounting base and limit actuators. The ASA4 is made in Italy and has a unique composite fibre base which has seen it stand the test of time over many years in Australia's salty coastal environment. Self locking and manual override key as standard along with the very reliable K32R logic control board. Australia's best value for money bar none!

POWER SUPPLY	240 Volts AC
MOTOR POWER	240 Volts AC
POWER ABSORBED	190 Watts
CYCLES / HOUR	15
OPERATING TEMPERATURE	-10C to +55C
WEIGHT	10kg
MAXIMUM GATE WEIGHT	400KG
SPEED	10 Mtrs/Min
MAXIMUM THRUST	390N
