

# The facts about ASA600240V

Manufactured in Italy by GR the ASA600240V is a linear style 240 volt swing gate electro mechanical operator suitable for gates to 5.0 metres wide. It is a non reversible operator with manual override key. One of the benefits of this 240 volt motor is the tremendous torque it develops allowing it to handle the large single swing gates.

The ASA600240V can be used with a number of 240 volt logic control boards including boards like LOGICSEADG240 which has a full host of functions to give total control over performance and slow down functions.

195mm high x 970mm wide x 90mm deep and 9.0kg. Opening time depends on your setup and the amount of stroke you use but best results on large gates com with slower speeds around 20 plus seconds.
