

ASA8 Sliding Gate Motor

A favourite Australia wide due to 12 volts dc motor and the ability to separate and relocate the transformer meaning the cabling from the power source to the motor can be low voltage. We even give you a transformer with the option of three voltages to allow for voltage drop on long cable runs. A DIY favourite and the best domestic solar power option in Australia.

TECHNICAL SPECIFICATIONS

POWER SUPPLY	240 Volts AC
MOTOR POWER	12 Volts DC
POWER ABSORBED	70 Watts
CYCLES / HOUR	40
OPERATING TEMPARTURE	-10C to +55C
WEIGHT	11kg
MAXIMUM GATE WEIGHT	800KG
SPEED	10 Mtrs/Min
MAXIMUM THRUST	390N
