

### W1/W3-B Quick Reference Programming Guide

To enter the programming mode	[*] [Master code] [#] 888888 is the default factory master code
To exit from the programming mode	[*]
<b>Note that to undertake the following programming the master user must be logged in</b>	
To change the master code	[0] [New code] [#] [New code] [#] The master code is any 6 digits
To add a PIN user	[1] [User ID number] [#] [PIN] [#] The ID number is any number between 1 ~ 2500. The PIN is any four digits between 0000 ~ 9999 with the exception of 1234 which is reserved. Users can be added continuously without exiting programming mode
To add a card user	[1] [Read Card] [#] Cards can be added continuously without exiting from programming mode
To delete a PIN or a card user	[2] [User ID number] [#] for a PIN user or [2] [Read Card] [#] for a card user Users can be deleted continuously without exiting from programming mode
<b>To Unlock the door</b>	
To unlock the door for a PIN user	Enter the [PIN] then press [#]
To unlock the door for a card user	Present the card

.7.

<b>To add and delete users in card and PIN mode ( [3] [7] [#] )</b>	
To Add a card and Pin user (The PIN is any four digits between 0000 ~ 9999 with the exception of 1234 which is reserved.)	Add the card as for a card user Press [*] to exit from the programming mode Then allocate the card a PIN as follows: [*] [Read Card] [1234] [#] [PIN] [#] [PIN] [#]
To change a PIN in card and PIN mode (Method 1) Note that this is done outside programming mode so the user can undertake this themselves	* [Read Card] [Old PIN] [#] [New PIN] [#] [New PIN] [#]
To change a PIN in card and PIN mode (Method 2) Note that this is done outside programming mode so the user can undertake this themselves	* [ID number] [#] [Old PIN] [#] [New PIN] [#] [New PIN] [#]
To delete a Card and PIN user just delete the card	[2] [User ID] [#]
<b>To add a card user in card only mode ( [3] [0] [#] )</b>	
To Add and Delete a card user	The operating is the same as adding and deleting a card user in [3] [2] [#]
<b>To delete All users</b>	
To delete ALL users. Note that this is a dangerous option so use with care	[2] [0000] [#]

<b>To add and delete card users by Manager cards</b>	
To add card user by Manager Add Card	[Manager add card] [Read card] [Manager add card] Cards can be added continuously.
To delete card User by Manager Delete Card	[Manager delete card] [Read Card] [Manager delete card] Cards can be deleted continuously.

.8.

<b>To unlock the door</b>	
For a PIN user	Enter the [PIN] then press [#]
For a card user	[Read card]
For a card and PIN user	[Read card] then enter [PIN] [#]

### 10.2 Door Relay, Door Open Detection, Alarm, Facility code Settings

<b>Door relay time setting</b>	
Door relay time setting	[4] [0~99] [#] The door relay time is between 0~99 seconds, the factory default setting is 5 seconds.

<b>Door Open Detection</b>	
<i>Door Open Too Long (DOTL) warning.</i> When used with an optional magnetic contact or built-in magnetic contact of the lock, if the door is opened normally, but not closed after 1 minute, the inside buzzer will beep automatically to remind people to close the door and continue for 1 minute before switching off automatically.	
<i>Door Forced Open warning.</i> When used with an optional magnetic contact or built-in magnetic contact of the lock, if the door is forced open, or if the door is opened after 20 seconds of the electro-mechanical lock not closed properly, the inside buzzer and alarm output will both operate. The Alarm Output time is adjustable between 0-3 minutes with the default being 1 minute.	

To disable door open detection. (Factory default setting)	[6] [0] [#]
To enable door open detection	[6] [2] [#]

<b>Alarm output time</b>	
To set the alarm output time (0~3 minutes) Factory default is 1 minute	[9] [0~3] [#]

**Keypad Lockout & Alarm Output options.** If there are 10 invalid cards or 10 incorrect PIN numbers in a 10 minute period either the keypad will lockout for 10 minutes or the alarm will operate for 10 minutes, depending on the option selected below.

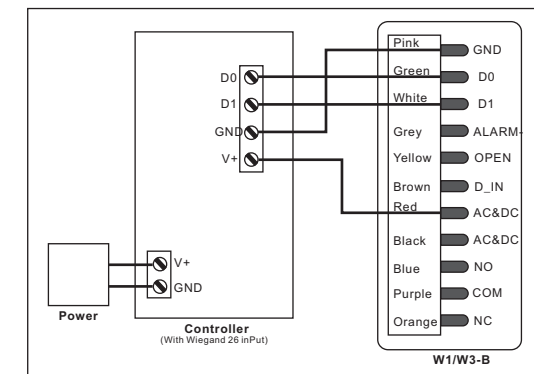

Normal status: No keypad lockout or alarm	[7] [0] [#] (Factory default setting)
---	---------------------------------------

Keypad Lockout	[7] [1] [#]
Alarm Output	[7] [2] [#]
<b>To remove the alarm</b>	
To reset the Door Forced Open warning	[Read valid card] or [Master Code] [#]
To reset the Door Open Too Long warning	Close the door or [Read valid card] or [Master Code] [#]
<b>To set the facility code</b>	
To set the facility code of W1/W3-B (This operation might be required when W1/W3-B is acting as wiegand reader and connecting to	[8] [Facility code] [#] [Repeat Facility code] [#] Facility Code can be any number between 1~255 (Default: 0)

### 11 Interconnecting Two Devices

#### 11.1 W1/W3-B operating as a Wiegand Output Reader

In this mode the W1/W3-B supports a Wiegand 26 bit output so the Wiegand data lines can be connected to any controller which supports a Wiegand 26 bit input. See figure 1.

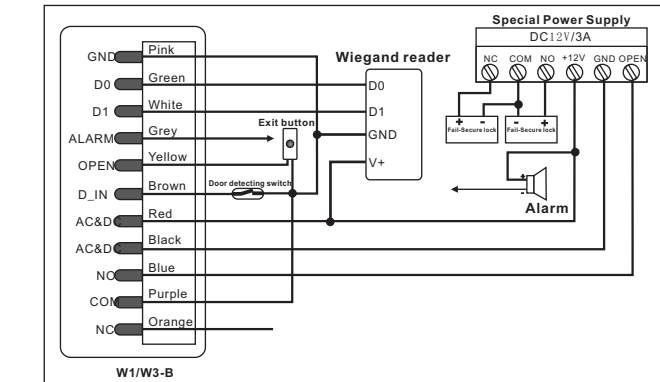

.9.

<b>Transmission Format:</b>	
◆ <b>1: Keypad Transmission</b> The Reader will transmit the PIN data when it receives the last key (#) press after PIN code.	
<b>Format:</b> Facility Code + PIN Code (Facility code is any digits between 0~255, factory default is 0; Pin code is any 1~4 digits between 0~9999)	
<b>Example:</b> Facility code: 1 PIN code: 5678 Press 5678 #, then the output format will be: 00105678	
◆ <b>2: Proximity Card Transmission</b> The Reader will transmit the card data when it reads the Card.	
<b>Format:</b> Card Number (the last 8 digits of Card Number)	
<b>Remarks:</b> No matter the card or pin is valid or invalid, the data will be transmitted	

#### 11.2 W1/W3-B operating as a Controller

In this mode the W1/W3-B supports a Wiegand 26 bit input so an external Wiegand device with a 26 bit output can be connected to the Wiegand input terminals on the W1/W3-B. Either an ID card reader (125KHZ) or an IC card reader (13.56MHZ) can be connected to the W1/W3-B. Cards are required to be added at the external reader, except where an external EM reader is used, in this case cards can be added at either reader or controller. See figure 2.

.10.

# Waterproof Keypad/Reader/Controller

W1-B

W3-B

User manual

## 1. Packing list

Name	Quantity	Remark
Digital Keypad W1/W3-B	1	
User Manual	1	
Screw driver	1	
Rubber bungs	4	6*27mm, used for fixing
Self Tapping Screws	4	3.5*27mm, used for fixing
Manager Card	2	Manager Add Card & Manager Delete Card

Please ensure that all the above contents are correct. If any are missing please notify the supplier of the W1/W3-B.

## 2. Description

*(W1-B&W3-B are in the same function, only different in shape.)*

W1/W3-B is single door multifunction access controller or a Wiegand output keypad or card reader. It is suitable for mounting either indoor or outdoor in harsh environments. It is housed in a strong, sturdy and vandal proof Zinc Alloy electroplated case. The electronics are fully potted so the W1/W3-B is waterproof and conforms to IP68. The W1/W3-B supports up to 2500 users in either a Card, 4 digit PIN, or a Card + PIN option. The inbuilt card reader supports EM, 125KHZ frequency card/Tag. The W1/W3-B has many extra features including block enrollment, wiegand 26 bits interface, and backlit keypad...etc.

These features make the W1/W3-B an ideal choice for door access not only for small shops and domestic households but also for commercial and industrial applications such as factories, warehouses, laboratories, banks and prisons.

## 3. Features

- Waterproof, conforms to IP68
- Strong Zinc Alloy Electroplated anti-vandal case
- Full programming from the keypad
- 2500 users, supports Card, PIN, Card + PIN
- Can be used as a stand alone keypad
- Programmable one relay output
- Backlight keypad
- Wiegand 26 input & output
- Adjustable Door Output time, Alarm time, Door Open time
- Block enrollment, can enroll maximum 2500 consecutive card within 3 minutes
- Very low power consumption (60Ma)
- Fast operating speed, <20ms with 2500 users
- Easy to install and program
- Built in light dependent resistor (LDR) for anti tamper

- Built in buzzer
- Red, Yellow and Green LEDs display the working status
- 12~24V AC/DC
- Two- year warranty

## 4. Specifications

Operating Voltage	12~24V AC/DC	Operating Humidity	5%~ 95% RH
User Capacity	2500	Environment	Conforms to IP68
Keypad	12 keys, 2 x 6 digits(W1-B)	Adjustable Door Relay time	0~99 seconds
	12 keys, 3 x 4 digits(W3-B)	Adjustable Alarm Time	0~3 minutes
Card Type	EM 125 KHZ card/Tag	Wiegand Interface	Wiegand 26 input & output
Card Reading Distance	3~6 cm	Wiring Connections	Electric Lock, Exit Button, DOTL, External Alarm
Active Current	<80mA	Dimensions	L135xW58xH26mm(W1-B)
Idle Current	≤40mA		L128xW82xH28mm(W3-B)
Lock Output Load	Max 2A	Net Weight	550 g
Alarm Output Load	Max 20A	Gross Weight	700 g
Operating Temperature	-25~60℃		

## 5. Installation

- Remove the back cover from the keypad using the supplied security screwdriver
- Drill 4 holes on the wall for the screws and 1 hole for the cable
- Fix the back cover firmly on the wall with 4 flat head screws
- Thread the cable through the cable hole
- Attach the keypad to the back cover.

W1-B

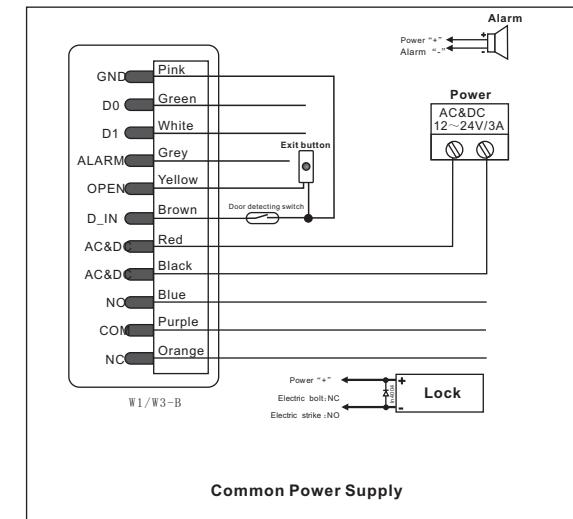

W3-B

PCB connect diagram

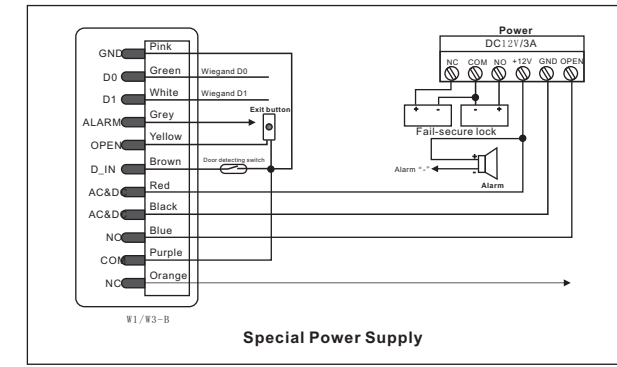

## 6. Wiring

Colour	Function	Description
Green	D0	Wiegand Output D0
White	D1	Wiegand Output D1
Grey	Alarm -	Alarm Negative
Yellow	OPEN	Request to Exit Button
Brown	D-IN	Door Contact
Red	12~24V AC&DC	12~24V AC&DC Power Input
Black	12~24V AC&DC	12~24V AC&DC Power Input
Blue	NO	Relay NO
Purple	COM	Relay COM
Orange	NC	Relay NC
Pink	GND	W1/W3-B Negative

## Connection Diagram

Common Power Supply

Special Power Supply

## Notes:

Connect the negative pole of the lock to NC is for Fail safe lock.  
Connect the negative pole of the lock to NO is for Fail-secure lock.

## 7. To Reset to Factory Default

To reset to factory default, power off, press **[\*]**, hold it and power on, release it until hear two beeps and the LED shines in orange, then read any two EM cards, the LED will turn in red, means reset to factory default setting successfully. Of the two EM cards read, the first one is Manager Add card, the second one is Manager Delete card.

**Remarks:** Reset to factory default, the user's information is still retained.

## 8. Anti Tamper Alarm

The W1/W3-B uses a LDR (light dependent resistor) as an anti tamper alarm. If the keypad is removed from the cover then the tamper alarm will operate.

## 9. Sound and Light indication

Operation Status	Red Light	Green Light	Blue Light	Buzzer
Power on	Bright	-	-	Short Ring
Stand by	Bright	-	-	-
Press keypad	-	-	-	Short Ring
Operation successful	-	Bright	-	Short Ring
Operation failed	-	-	-	3 Short Ring
Enter into programming mode	Bright	-	-	Short Ring
In the programming mode	-	-	Bright	-
Exit from the programming mode	Bright	-	-	Short Ring
Open the door	-	Bright	-	Short Ring
Alarm	Bright	-	-	Alarm

## 10. W1/W3-B Detailed Programming Guide

### 10.1 User Settings

To enter the programming mode	<b>[*]</b> <b>[Master code]</b> <b>[#]</b> 888888 is the default factory master code
To exit from the programming mode	<b>[*]</b>
<b>Note that to undertake the following programming the master user must be logged in</b>	
To change the master code	<b>[0]</b> <b>[New code]</b> <b>[#]</b> <b>[New code]</b> <b>[#]</b> The master code is any 6 digits.
<b>Setting the working mode:</b>	
Set valid card only users	<b>[3]</b> <b>[0]</b> <b>[#]</b> Entry is by Card only
Set valid card <b>and</b> PIN users	<b>[3]</b> <b>[1]</b> <b>[#]</b> Entry is by Card <b>and</b> PIN together
Set valid card <b>or</b> PIN users	<b>[3]</b> <b>[2]</b> <b>[#]</b> Entry is by either Card <b>or</b> PIN (default)
<b>To add and delete users in either card or PIN mode</b> <b>[3]</b> <b>[2]</b> <b>[#]</b> (Default setting)	

To add a <b>PIN</b> users	<b>[1]</b> <b>[User ID number]</b> <b>[#]</b> <b>[PIN]</b> <b>[#]</b> The ID number is any number between 1 ~ 2500. The PIN is any four digits between 0000 ~ 9999 with the exception of 1234 which is reserved. Users can be added continuously without exiting from programming mode as follows: <b>[1]</b> <b>[User ID No.1]</b> <b>[#]</b> <b>[PIN]</b> <b>[#]</b> <b>[User ID No.2]</b> <b>[#]</b> <b>[PIN]</b> <b>[#]</b>
To Delete a <b>PIN</b> user	<b>[2]</b> <b>[User ID number]</b> <b>[#]</b> Users can be deleted continuously without exiting programming mode
To change the <b>PIN</b> of a PIN user (Note: This step must be done out of programming mode)	<b>[*]</b> <b>[ID number]</b> <b>[#]</b> <b>[Old PIN]</b> <b>[#]</b> <b>[New PIN]</b> <b>[#]</b> <b>[New PIN]</b> <b>[#]</b>
To add a <b>card</b> user (Method 1) This is a fast way to enter cards using ID number auto generation.	<b>[1]</b> <b>[Read Card]</b> <b>[#]</b> Cards can be added continuously without exiting programming mode
To add a <b>card</b> user (Method 2) This is the second way to enter cards using User ID Allocation. In this method a User ID is allocated to a card. Only one user ID can be allocated to a single card.	<b>[1]</b> <b>[ID number]</b> <b>[#]</b> <b>[Card]</b> <b>[#]</b>
To add <b>card</b> user (Method 3) Add a <b>series cards</b> users <b>Block Enrollment</b>	<b>[5]</b> <b>[ID number]</b> <b>[#]</b> <b>[8 digits Card number]</b> <b>[#]</b> <b>[Card quantity]</b> <b>[#]</b> Card quantity is between 1~2500. The 8 digits card number is the last 8 digits on the card. Maximum 2500 cards can be enrolled at a stretch within 3 minutes.
To delete <b>card</b> user by card number. Note Users can be deleted continuously without exiting from programming mode.	<b>[2]</b> <b>[Read Card]</b> <b>[#]</b>
To delete a <b>card</b> user by user ID. This option can be used when a user has lost their card	<b>[2]</b> <b>[User ID]</b> <b>[#]</b>

# SELF INSTALL - NEED TECHNICAL ASSISTANCE?

## OPTION 1: DIRECT WITH THE SERVICE DESK – QUICKEST AND MOST EFFECTIVE METHOD

Submit your enquiry direct with the service desk at – [service@automaticsolutions.com.au](mailto:service@automaticsolutions.com.au)

The service desk has the most experienced staff in Australia to help with your problem but they need your help.

- Describe your problem in detail and as clearly as possible. Don't forget to include a telephone number.
- Be certain to detail which model or models of you are working with.
- Send photos of the installation – they love photos. The people at the service desk are good but they are even better when they can see the installation. Send photos of the overall scene so they can see the entire installation. Also send photos of the wiring to the control board and any other part of the installation you think is relevant.
- Send video if appropriate. Smartphone's these days take remarkably good video in small file sizes which can be emailed in a moment. If your problem needs a video to show the issue please feel free to send it.

**NOTE: THIS IS BY FAR THE FASTEST AND MOST SUCCESSFUL WAY TO SOLVE YOUR PROBLEM  
PHOTOS AND VIDEOS ARE THE NEXT BEST THING TO BEING THERE**

## OPTION 2: LODGE YOUR ENQUIRY LOCALLY - SLOWER BUT CAN STILL BE EFFECTIVE

Make contact with the store of purchase. Branch staffs are typically not technicians and dependent on their length of service will have varying degrees of technical knowledge. If they cannot help however they will certainly either source help locally from their technicians or make contact with the service technicians on your behalf.

## OPTION 3: SERVICE CALL WITH AUTOMATIC SOLUTIONS TECHNICIAN – SLOWEST METHOD

If you fall within the local branch service area it may be possible to book a local technician to look at your installation. Wait times will vary dependent on local workloads. The cost is a service fee which includes the first half hour and the hourly rate thereafter. If any Automatic Solutions provided parts are found to be defective and within warranty these will be provided free of charge.

(NOTE: If you suspect that any parts are defective and within warranty you may wish to consider option 4)

*A note on this option: If you decide on this option you will be asked to sign an "authorisation to proceed" which will provide legal authority and payment security. This form has three options available of which only the first two are available to you. The third option is for warranty repairs only for full install customers. Self install customers requiring warranty only service need to refer to option four below.*

**IMPORTANT: IN SHORT THIS OPTION WILL INCUR CHARGES**

## OPTION 4: RETURN THE PRODUCT IF BELIEVED TO BE FAULTY

As a self install customer who has purchased product if you believe the product to be faulty rather than an installation or site problem you have the option of returning the product for evaluation and to exercise your right to a replacement, repair or refund as applicable. All returned product is forwarded immediately to the service technicians for evaluation and response. There are two main methods available to return product –

- Direct to the service centre – this is the quickest method as it cuts out the branch delay
- Via the branch of purchase – slower because of the delay at the branch

When choosing this option you need to complete a product return form. This form gives you all the information on procedure involved and where to send to. These are available at the branch of purchase, can be emailed to you (contact your branch), or available here - <http://automaticsolutions.com.au/page/warranty.php>
