

# The facts about MB24

Manufactured in Italy by Beninca the MB24 is a harmonic style or articulated 24 volt swing gate electro mechanical operator suitable for gates to 2.5 metres wide.. It is a non reversible operator with manual override key and limit switches. One of the benefits of the 24 volt motor is the ability to use battery backup meaning you may never have to use the manual override. This style of swing gate operator demands strong components and as always Beninca have over engineered with the use of tempered steel prominent.

The MB24 is best married to the BENINCA control board commonly called "Brainy". Brainy has a full host of functions to give total control over performance and slow down functions. Available as the MB24 operator only for use with existing or other control systems the MB24 also comes as a kit with two operators, Brainy logic control and two remote controls.

234mm high x 184mm wide x 245mm deep and 9.0kg. Opening time is 10 seconds.
